Art Unit: 2124

1. The examiner respectfully requests the PRIOR ART which is described by applicants' Fig. 2.
2. The abstract of the disclosure is objected to because legal phraseology is used in this paragraph (i.e., "comprising"). Correction is required. See MPEP § 608.01(b).
3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
4. The drawings are objected to because Figs. 2, 7 and 9 should be labeled "PRIOR ART". A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
5. The disclosure is objected to because of the following informalities:

In the Pre. Amendt.; the power "b" of X**b should be --6--.

Appropriate correction is required.
6. Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claim language seems to be vague and indefinite. For instance, although the preamble of independent claims 1 & 9 claim method / apparatus for "generating a pseudo-random bit series based on a given polynomial of order N for M parallel communication lines", the claims fail to recite the necessary relationship between "N" and "M". According to Fig. 2 (Prior Art), N and M are the same and the number of flip-flops are N; however, Fig. 11 shows $(2^{**}N - 1)$ of flip-flops and $M = 2^{**}N$ parallel communication lines for a "given polynomial of order N." Clarification are requested.

As per claims 2, 5 and 6-7, the periods "." at the ends are missing.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cited references are art of interest.
